AttainU Question ID: 216

In today's CC, you need to create a stack emulator. The user will enter a number/string and clicks on push to push the number to the stack. The user will click on pop button which will remove the last inserted number/string from the stack.

Stack Emulator

The Number You Want Add To The Stack

Enter The Number

Push | Pop

123,32,44

Note:

- You have the freedom to style in anyway you like.
- Appropriate validations like, clicking on push without entering into the input field should tell user to enter something in the field. Similarly, clicking on pop should inform user if the stack is empty.
- No embedded JavaScript. Your JavaScript code should be written in a .js file and should be linked accordingly.
